Scodix Ultra 1000's Series - Options

Scodix VDE™ : Barcode Reader	Scodix Braille™
Scodix Cast&Cure™	Scodix Crystal™
Scodix Studio Packages (Station, W2P, Customized W2P)	

* Based on Scodix Recommended Foil List (RFL) and Recommended Substrate List (RML) for foil where surface tension should be within range of 36-44 dyne/cm. Print results may vary between print modes, and appearance may be different based on substrates surface tension and quality.

Scodix Technology Advantages

- Scodix RSP™ (Rotate, Scale, Position), perfect registration from the 1st page
- Scodix ARP™ (Automatic Registration Process) – 3 registration methods – OPA dots, CMYK elements, corners
- Scodix PAS™ - (Pin, Activate, Secure) a patented Scodix process for applying foil
- Scodix Studio Station – External RIP. accelerated job processing, continuous printing as processing occurs in parallel to press operations
- Scodix Studio W2P - Software and hardware package for web-to-print customers
- Scodix Studio W2P Customized - Software and hardware package for web-to-print customers, wanting unique automation integration
- Scodix VDP / VDE™ - Variable Data Enhancement using Barcode – Digital, inhouse solution
- Scodix High Impact - 250 micron
- Scodix Sustainability - A clean, green process – Recyclable, no VOC, no plates, no molds, no solvents, minimum make-ready ...
- Unique heatless foil process which does not damage plastic media, sensitive substrates, inks
- Applicable with a variety of WW foil manufacturers
- Scodix 99 GU (Gloss Units)
- Scodix Variable Density - 1-100%
- Best-in-class performance

Scodix Advantages vs. Competition

- Scodix Ultra 1000's series - Segmented product portfolio
- Reliable and credible industrial production presses
- Multiple polymer platform providing solutions for wide range of substrates and applications
- Registration - 4 CCD cameras, Scodix RSP™, Scodix ARP™ with 3 registration options
- Substrate Handling - Scodix Twin-Tray™ Technology, linear encoder
- Over 400 Presses installed WW
- Scodix company is 100% focused on digital enhancement
- Polymer thickness - up to 250 microns in 1-pass
- Market leaders selected Scodix
