

# Omega Horizon

The Omega Horizon is a multifunctional, bi-directional, servo-driven lay flat rewinder and inspection solution.

It is designed to enable you to inspect and re-work single lanes and can be upgraded with our very own in-house fleyeVision 100% print inspection system.

This rewinder is suitable for pharmaceutical applications by selecting the fully integrated backside / frontside numbering.

## Features & Benefits

### Versatile options

Multifunctional table top rewinding section.

### Easy to use

Simplistic toolless mandrel exchange.

### Precision finishing

Full integrated backside frontside numbering, perfect for pharmaceutical applications,.
